

Rev A to Rev A1

Page 10 – added clarity to the following sentence:

From:

The curser will change ... So let's select the entire left hand side ~~of the~~ (not including the IOs) to be our Empty Region. This should force Place and Route to put the resources somewhere else in the part.

To:

The curser will change ... So let's select the entire left hand side (not including the IOs or the clock drivers in the middle) to be our Empty Region. This should force Place and Route to put the resources somewhere else in the part.

Page 22 – corrected spelling of the word “buffer” in the last sentence of the second to last paragraph.

From:

The SmartDebug ... connected them to the output puffers that drive the unused LEDs on the board.

To:

The SmartDebug ... connected them to the output buffers that drive the unused LEDs on the board.

Rev A1 to Rev A2

Page 11 – corrected sentence from left to right half

We'll look at that, all of our design has now moved over to the right half of the chip.

Page 13 – corrected second file name to include the “_ba”.

The files (LedBlinkingDSpeed_ba.v(hd) and LedBlinkingDSpeed_ba.sdf) can be seen on the ...

Page 22 – Changed start of sentence from Let's to Select

Let's **Insert probe(s) and program the device.** Click the **RUN** button.

Select **Insert probe(s) and program the device.** Click the **RUN** button.
